

### Our #1 customer is one of the top companies in the world!

General Electric Company ([GE](#)) is one of the largest and most valuable companies in the world. GE is a technology and financial services company that develops and manufactures products for the generation, transmission, distribution, control and utilization of electricity. Its products and services include aircraft engines, power generation, water processing, security technology, medical imaging, business and consumer financing, media content and industrial products.

It all started in 1996 when GE Transportation, a division of GE and a pioneer in passenger and freight locomotives, gave the Logistics Plus founder and CEO a one-year, three-person purchase order to help manage inbound logistics. That relationship would grow into a worldwide global supply chain partnership. GE Transportation was our very first customer, and today it tops a list of more than a thousand other companies that work with Logistics Plus across many different industries--including energy, manufacturing, assembly, heavy industrial, food, wholesale, retail, technology, and many more.

Nearly 20 years later, multiple divisions of GE continue to rely on [Logistics Plus](#) as one of its most valued supply chain partners. If our solutions work for GE, they will work for your business, too.

#### Logistics Plus [4PL solutions](#) provided to GE Transportation (GET):

- Logistics Plus has nearly a dozen on-site Logistics Plus employees working across various units of GET (e.g., Global Services, Locomotive, Marine, Mining, Signaling, etc.) to provide global export/import logistics support. This includes supply chain consulting, export/import document preparation and filing (AES-Automated Export System, EEI-Electronic Exporter Information, ATA Carnet, ISF-Importer Security Filing, etc.), third-party communications, customer profile maintenance, letters of credit, financial administration, invoice audits and corrections, transportation coordination, issue resolution, returns management, shipment tracking, detailed logistics and financial reporting, and other special projects (e.g., Lean Events, Oracle implementations, etc.).
- We have off-site dedicated resources supporting GET with harmonized tariff schedule classifications (HTS) and global compliance training.

### Logistics Plus [North American solutions](#) provided to GE Transportation (GET):

- Logistics Plus coordinates 10-25 or more daily truckload moves within the U.S. and across the U.S./Mexico border for GET.
- We provide both standard and foreign trade zone (FTZ) warehousing and distribution services in Dallas, TX and Erie, PA for GET and its suppliers. Our WMS-managed (Warehouse Management Software) facilities are well-suited for large, industrial products with forklifts that have significant heavy-lifting capacity.
- We provide industrial painting for GE and its suppliers across a variety of heavy-lift (up to 65K lbs.), oversize and industrial applications at our [NTL](#) (National Truckload) facility in Erie, PA, with both temporary and long-term storage.
- Our NTL division also supports GET with dedicated transportation services and equipment, including dry vans, flatbeds, and step-decks (both regional and OTR).

### Logistics Plus [international solutions](#) provided to multiple GE divisions:

- Logistics Plus has managed numerous international cargo projects for GET including an order to deliver 100 locomotives to Indonesia, each measuring 20.8 x 3.2 x 4.3 meters, weighing in at 132 metric tons a piece.
- In Mexico, we provide logistics services to GE Transportation, GE Appliances & Lighting, and GE Oil & Gas. This includes ocean and air import and export services between Mexico and Asia, Europe, and South America; and intra-Mexico ground transportation services.
- In China, we provide consolidation and freight forwarding services to GE Transportation

### Logistics Plus [4PL solutions](#) provided to GE Measurement & Control (GE M&C) Systems:

- Logistics Plus has approximately 12 employees dedicated to GE M&C, both onsite and offsite. Services include customs compliance, logistics execution and mode optimization, transportation quoting, carrier management, and reporting.
- Key GE M&C operations are located in the U.S., Canada, Mexico, Europe, India, and China – all areas in which Logistics Plus has established numerous local offices for regional support.
- Since 2009, GE M&C and Logistics Plus have worked collaboratively to implement best practices and reduce costs. To date, total cost reductions are estimated to be more than \$9 million.
