

Freight Forwarding & GLOBAL LOGISTICS

International Air Freight

As a full-service international air freight forwarder with offices around the globe, we have years of experience working with our airline partners to ensure you meet your air freight deadlines.

Air Charter Services

Air freight charter and air cargo charter services are designed to fill air freight providers' traditionally scheduled service gaps. An air charter involves getting an exclusive aircraft booked from a specific origin to destination for your cargo needs based upon your time frame.

International Ocean Freight

As a full-service international ocean freight forwarder with many offices worldwide, we have years of experience working with our ocean vessel partners to make sure you meet your ocean freight deadlines.

Project Cargo & Break Bulk

We handle cargo and freight that the "other guys" can't or won't, and we manage your project from start to finish. Your logistics plan will be customized for your unique project needs. Every shipment is coordinated with tailored plans, and even the most demanding projects are executed with care and precision.

Customs Brokerage

Our licensed customs brokers understand that import regulations and tariff rates are seemingly changing on a daily basis. We save time and reduce delays by interfacing electronically with customs to offer Remote Location Filings (RLF) for any port.

Global Trade Compliance

Maintaining trade professionals with the skills required to effectively manage global trade compliance is vital to a company's success. Logistics Plus can manage your firm's import and export compliance activities as an outsourced strategic third-party partner, or we can augment your existing internal compliance team.
